APPENDIX I

THE HOUSING SURVEY

#1

The survey was conducted during the months of April and May, 1940 utilizing volunteer students from Albany State Teachers College as enumerators, within two blighted, residential areas in downtown Albany selected for detailed study. These areas were designated respectively as Area I (Lincoln Park Area) and Area II (Elk-Van Woert Ave.)

Preceding the door to door survey, representatives of the State Division of Housing visited, listed and classified as residential or non-residential, each structure within the areas. Residential structures were classified further as to condition and number of occupied and vacant dwelling units contained. This listing revealed a total of 5,123 occupied dwelling units in the two areas. In order to secure detailed information concerning the occupants of these dwelling units, a 14 per cent stratified sample of these occupied dwelling units was selected. Enumerators then secured the detailed information called for in the household enumeration schedule from the occupants of each dwelling unit selected. Upon completion of the survey the Chi Square test for significance was applied to each area sample with respect to family income, contract rent and number of persons per dwelling unit. This test revealed no significant differences, and therefore the results secured in the survey represent a true picture of the total population within the surveyed areas.

Thus, structure data presented below are based on a 100 per cent coverage while dwelling unit and family data are based on a sample equal to 14 per cent of the number of occupied dwelling units in the two areas.

SUMMARY TABULATIONS
SAMPLE SURVEY OF HOUSING AND RELATED INFORMATION
OSWEGO, NEW YORK
AS OF MAY-JUNE 1944

* * * *

The following tabulations report the summary data from a ten percent sample of the survey of dwelling units in Oswego, conducted under the auspices of the Mayor's Committee on Housing. The city-wide ten percent sample includes a ten percent sample from each side of the Oswego River, further details of which are described in the narrative accompanying these tables. A second ten percent sample taken from the west side of the river was also tabulated, but since it was used principally as a check against the other samples its purpose was achieved, hence it is not treated with here. The Chi Square test of significance was applied to the major tables of the samples.

STRUCTURE DATA

The number and percentage distribution of residential structures by type of structure was as follows:

TABLE 1

Type of Structure	Total Sample		West Side Sample		East Side Sample	
	Number	Percent	Number	Percent	Number	Percent
One Family Detached	340	78.0	207	81.2	133	75.6
One Family Attached	16	3.7	11	4.3	5	2.8
Two Family	43	10.0	15	5.9	28	15.9
Three Family or More	13	3.0	8	3.1	5	2.8
Dwellings with Business	15	3.5	11	4.3	4	2.3
Rooming House	3	0.7	2	0.8	1	0.6
Other Type	1	0.2	1	0.4	0	0.0
Total	431	100.0	255	100.0	176	100.0

The number and percentage distribution of residential structures by condition of structure was as follows:

TABLE 2

Condition of Structure	Total Sample		West Side Sample		East Side Sample	
	Number	Percent	Number	Percent	Number	Percent
Good or Fair	261	60.7	173	68.1	88	50.0
Need of Minor Repairs	117	27.2	59	23.2	58	33.0
Need of Major Repairs	50	11.6	20	7.9	30	17.0
Unfit for Use	2	0.5	2	0.8	0	0.0
Total Reported	430	100.0	254	100.0	176	100.0
Not Reporting Condition	1		1		0	
	431		255		176	

Note: All percentages are based on totals exclusive of the "not reported" group.

STANDARD TABLES AND COMMENTS
SURVEY OF HOUSING CONDITIONS
TROY, NEW YORK
AS OF MARCH-APRIL, 1944

CLERK
MCL

4
COPY
18
49

The survey of housing conditions in Troy covered the following areas:

Ward Number	Block Numbers	Total Blocks
2	576, 577	2
4	465, 466, 467, 468	4
11	660, 661, 662, 665, 669, 670, 671, 672, 673, 674 675, 676, 677, 678, 679, 681 682, 684, 686, 687	20
	Total	26

The number and percentage distribution of residential structures by type of structure was as follows:

Type of Structure	ALL WARDS		WARD 4		WARD 2		WARD 11	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent
One Family Attached	36	8.0	18	12.9	5	6.8	13	5.4
One Family Detached	20	4.4	7	5.1	1	1.4	12	5.0
Two Family	264	58.3	66	47.5	28	38.3	170	70.5
Three Family	91	20.1	32	23.0	31	42.5	28	11.6
Four or more Families	15	3.3	5	3.6	7	9.6	3	1.3
Dwellings with Business	26	5.7	10	7.2	1	1.4	15	6.2
Rooming Houses	1	0.2	1	0.7	0	0.0	0	0.0
Total	453	100.0	139	100.0	73	100.0	241	100.0

The number and percentage distribution of residential structures by condition of structure was as follows:

Condition of Structure	ALL WARDS		WARD 4		WARD 2		WARD 11	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent
Good or Fair	271	59.8	66	47.5	38	52.1	167	69.3
Need of Minor Repairs	122	26.9	49	35.3	26	35.6	47	19.5
Need of Major Repairs	44	9.7	19	13.1	9	12.3	16	6.6
Unfit for Use	12	2.7	5	3.5	0	0.0	1	2.9
Total Reported	449	99.1	139	100.0	73	100.0	237	98.3
Condition Not Reported	4	0.9	0	0.0	0	0.0	4	1.7
Total	453	100.0	139	100.0	73	100.0	241	100.0
